

Resistor Set card number	18
--------------------------	----

Lab Partners names (if you had one)	N/A
-------------------------------------	-----

Just copy the colors over from the first lab Lab-01a

resistor number on the card (count from the top down)	colors	colors	colors (multiplier)	colors (tolerance)	Listed Value in Ohms Based on the color codes	Measured Value in Ohms Based on the Digital Volt Meter (DVM)	Calculate Percent error of this specific resistor.
	1st band	2nd band	3rd band	4th band (metallic)			Error = [(measured_value - listed_value)/listed_value] * 100
1	Brown - 1	Green - 5	Green - 5	Gold - 5%	1.500 MΩ	1.504 MΩ	(1.504 - 1.500) x 100 = 0.4
2	Yellow - 4	Purple - 7	Red -2	Gold - 5%	4.7 KΩ	4.612 KΩ	(4.612 - 4.7) x 100 = 8.3
3	Brown - 1	Black - 0	Blue - 6	Gold - 5%	10 MΩ	10.04 MΩ	(10.04 - 10) x 100 = 4
4	Brown - 1	Grey - 8	Brown - 1	Gold - 5%	180 Ω	177.2 Ω	(177.2 - 180) x 100 = 280
5	Red - 2	Red - 2	Yellow - 4	Gold - 5%	220 KΩ	219 KΩ	(219 - 220) x 100 = 100

6	Orange - 3	Orange - 3	Orange - 3	Gold - 5%	33 K Ω	32.53 K Ω	$(32.53 - 33) \times 100 = 47$
7	Blue - 6	Grey - 8	Black - 0	Gold - 5%	68 Ω	68 Ω	$(68 - 68) \times 100 = 0$
